## 1. Introduction

This project automates the laptop request process within an organization using the ServiceNow platform. Traditionally, employees request laptops through emails, phone calls, or manual forms, which can result in delays, communication gaps, and difficulty in tracking requests.

This system replaces manual processes with a fully automated workflow using **Service Catalog, Flow Designer, Approval Workflow, Email Notifications, and Catalog Tasks**.

The system follows a structured lifecycle:

**Request Submission → Manager Approval → Catalog Task Creation → Laptop Provisioning → Completion Notification**

## 2. Project Overview

### Purpose

The purpose of this project is to automate laptop requests and make the process faster, transparent, and efficient.

### Features

- Service Portal-based laptop request submission

- Automatic REQ & RITM creation
- Manager approval workflow
- Automatic email notifications
- Catalog Task generation for IT Support
- End-to-end request tracking
- Audit logs for all activities

The screenshot shows the 'Catalog Item' form in ServiceNow. At the top, there's a header with 'Catalog Item' and 'New record'. Below it, a blue banner reads 'Build and modify items faster with the improved Catalog Builder.' followed by instructions: 'Catalog items are goods or services available to order from the service catalog. Items can be anything from hardware, like tablets and phones, to software applications, to furniture and office supplies. Enter a Name and Short description to display for the item. Enter a Price, approvals, variables, and other information as needed.' The form fields include: 'Name' (Laptop Request), 'Application' (Laptop Request Process), 'Active' (checked), 'Fulfillment automation level' (Unspecified), 'Catalogs' (Service Catalog), 'Category' (Hardware), 'State' (None), 'Checked out' (None), and 'Owner' (System Administrator). At the bottom, there are tabs for 'Item Details', 'Process Engine', 'Picture', 'Pricing', and 'Portal Settings'. The 'Short description' field contains 'Request a laptop for official use' and the 'Description' field is empty.

### 3. Architecture

#### Frontend

#### ServiceNow Service Portal

Used by employees to submit laptop requests.

#### Backend

- Flow Designer
- Approval Engine
- Notification Engine

Handles complete automation logic.

#### Database

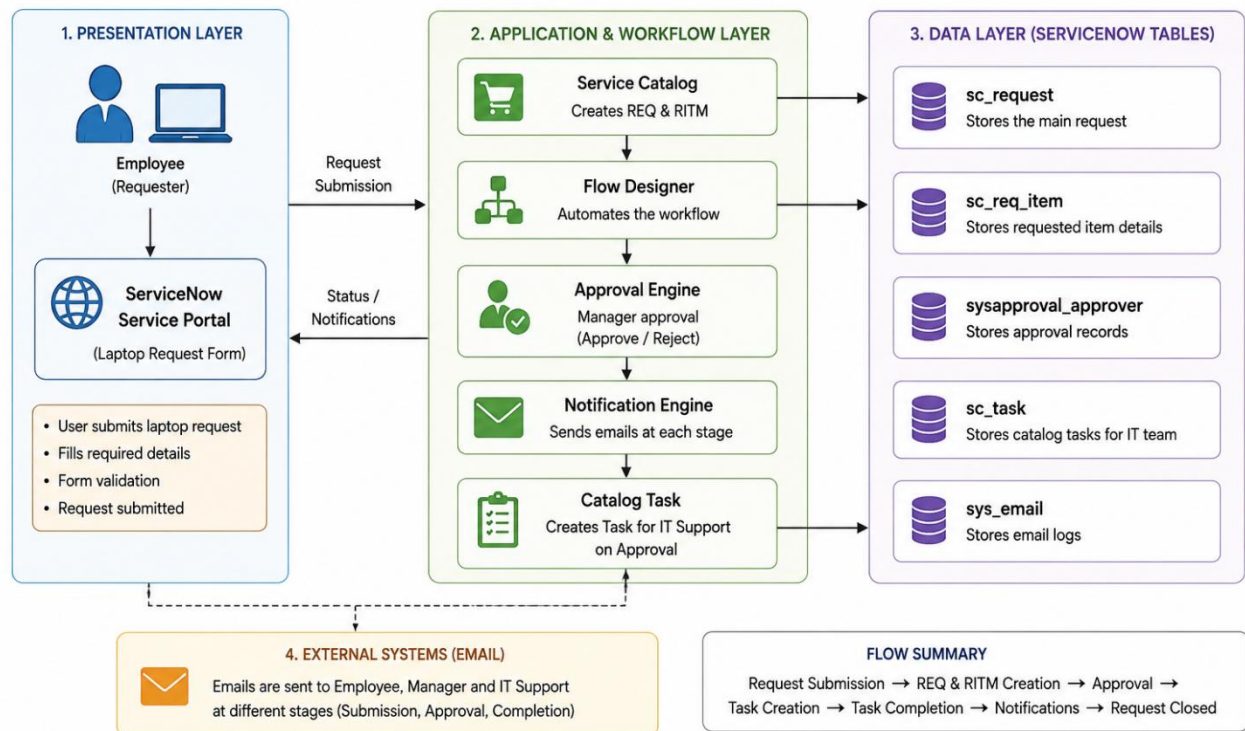

ServiceNow Tables:

- sc\_request → Stores request records
- sc\_req\_item → Stores requested items

- sc\_task → Stores Catalog Tasks
- sysapproval\_approver → Stores approval data
- sys\_email → Stores email notifications

## Laptop Request Process – Architecture Diagram

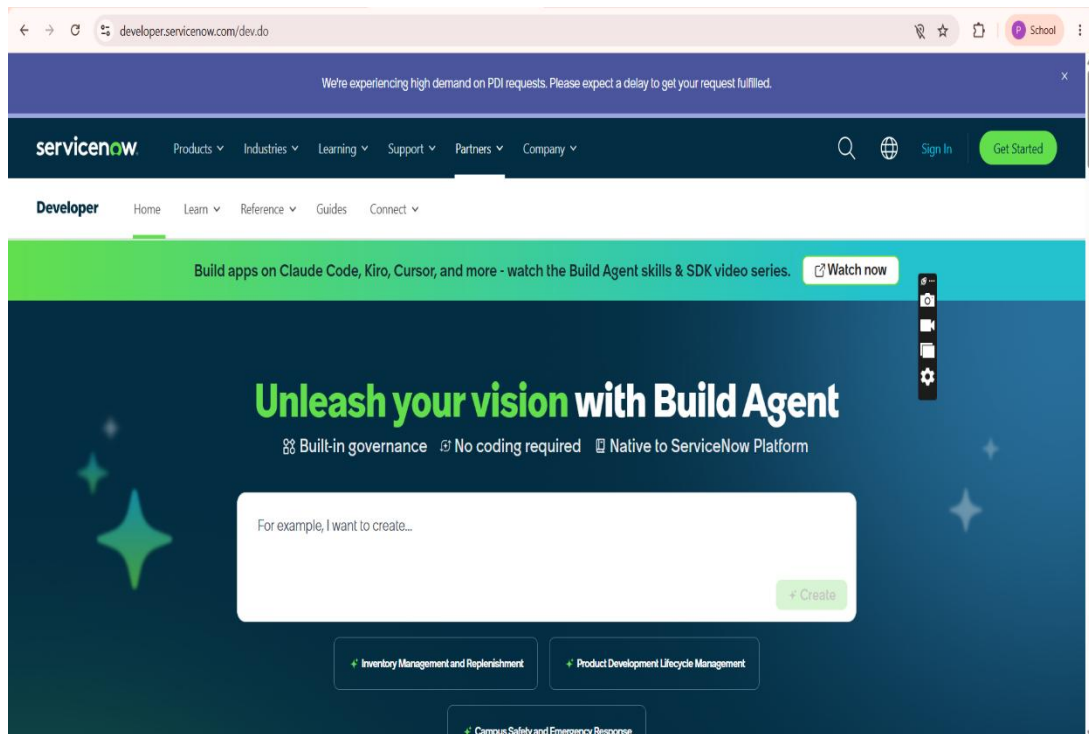

High Level Architecture

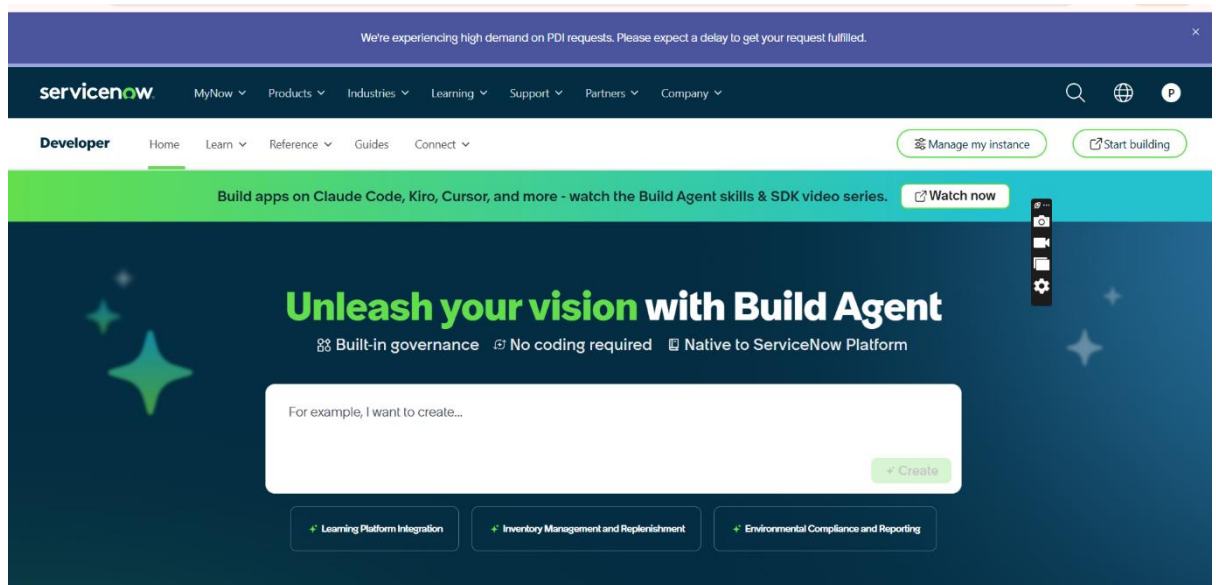

## 4. Setup Instructions

### Step 1: Create Developer Instance

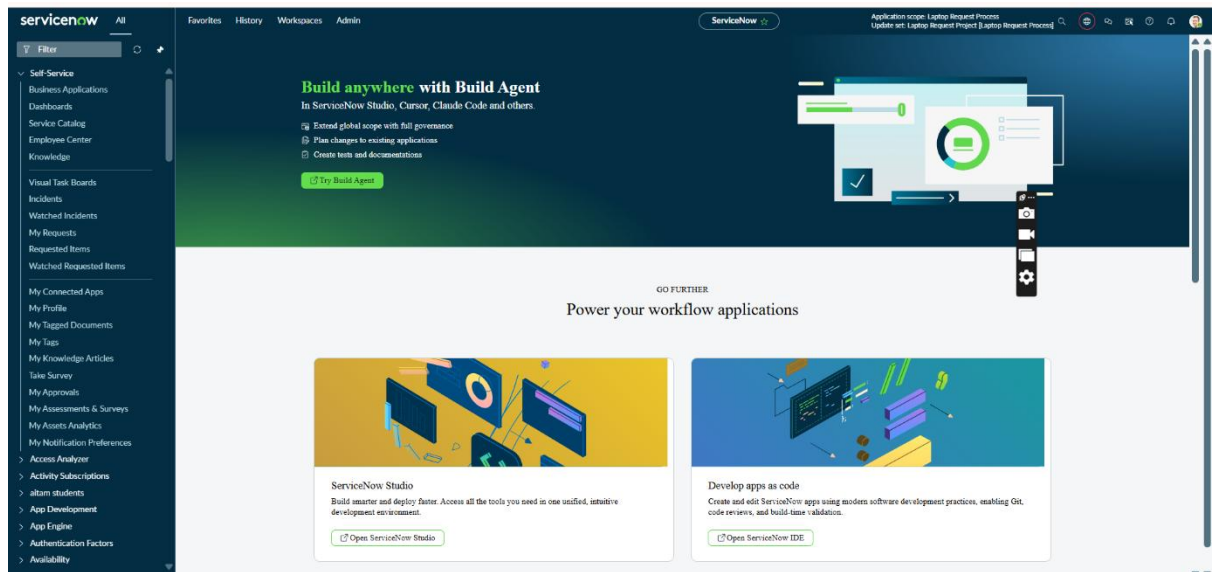

1. Go to ServiceNow Developer Portal
2. Login / Sign Up

### 3. Request Personal Developer Instance

### 4. Click Start Building

## Step 2: Open ServiceNow Instance

1. Open Instance URL
2. Login as Admin

## Step 3: Enable Required Modules

Search in Application Navigator:

- Service Catalog
- Flow Designer
- User Administration
- Notifications

## 5. Service Catalog Creation

### Step 1: Create Catalog Item

1. Navigate to Service Catalog → Maintain Items
2. Click New
3. Select Catalog Item
4. Name: Laptop Request
5. Category: Hardware
6. Click Submit

**Catalog Item**  
Laptop Request

Build and modify items faster with the improved [Catalog Builder](#).

Catalog Items are goods or services available to order from the service catalog. Items can be anything from hardware, like tablets and phones, to software applications, to furniture and office supplies.

- Enter a Name and Short description to display for the item.
- Enter a Price, approvals, variables, and other information as needed.

## 9. AUTHENTICATION

### Roles Used

- Employee → Request Submission
- Manager → Approval
- IT Support → Laptop Provisioning
- Admin → Configuration

### Security

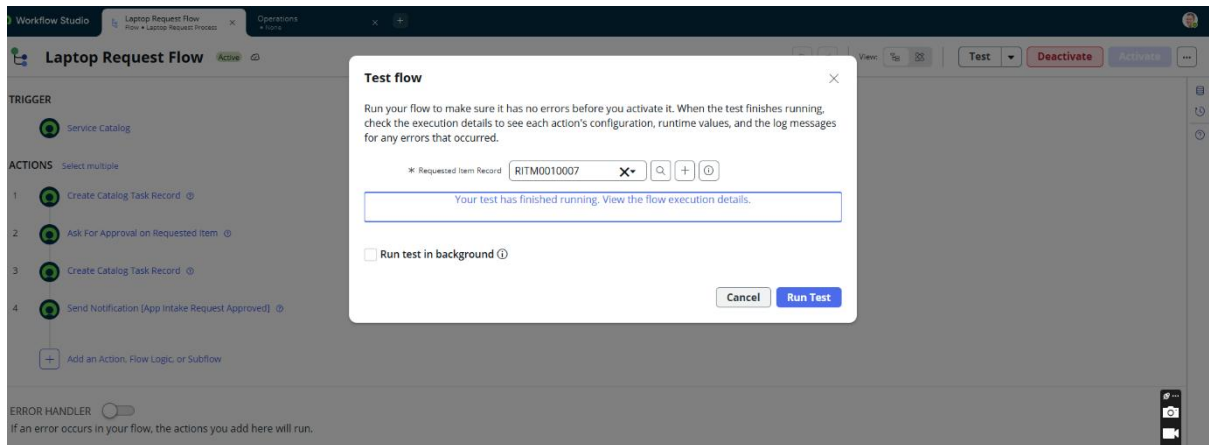

- Role-Based Access Control (RBAC)
- ServiceNow ACL Rules

## 10. TESTING

### Test Steps

- Submit Laptop Request
- Verify REQ Created
- Verify RITM Created
- Verify Approval Sent
- Approve Request
- Verify Catalog Task Created
- Verify Email Notifications

- Verify Request Completion

The screenshot shows the 'EXECUTION DETAILS' page for the 'Laptop Request Flow'. The page has a header with 'EXECUTION DETAILS' and 'Laptop Request Flow'. Below the header is a table with columns for 'State', 'Start time', and 'duration'. The table shows a single execution record with the state 'Completed', start time '2025-06-20 09:49:45', and duration '166ms'. The flow is marked as 'Completed'.

| State     | Start time          | duration |
|-----------|---------------------|----------|
| Completed | 2025-06-20 09:49:45 | 166ms    |

✓ Result: All workflows executed successfully.

## 11. RESULTS

- ✓ Laptop Request Automation Working
- ✓ Manager Approval Workflow Working
- ✓ Email Notifications Working
- ✓ Catalog Task Creation Working
- ✓ End-to-End Automation Successful

## 12. ADVANTAGES

- Fully automated workflow
- Faster approval process
- Reduced manual effort
- Real-time request tracking
- Improved communication
- Better transparency
- Increased operational efficiency

### **13. DISADVANTAGES**

- Depends on ServiceNow platform availability
- Requires internet connectivity
- Initial configuration effort required
- Users may require basic ServiceNow training

### **14.Future Enhancements**

- **Multi-Level Approval Workflow** – Add approvals from Department Heads or Finance teams before laptop allocation.
- **Laptop Inventory Integration** – Automatically check laptop availability before approving requests.
- **Asset Management Integration** – Track assigned laptops and maintain complete asset records.
- **Dashboard and Reporting** – Generate reports and dashboards for request tracking and performance analysis.
- **Mobile Access Support** – Allow users to submit and track requests through mobile devices.
- **Automated Laptop Assignment** – Recommend or assign laptops automatically based on employee role and department.
