Brainstorm & Idea Prioritization : Laptop Automation Process

The aim of this project is to automate the laptop request process within an organization using ServiceNow. Employees can request a laptop for official use through the Service Catalog by providing details such as laptop type and justification. The request is automatically routed to the manager for approval using Flow Designer. Once approved, a catalog task is generated and assigned to the IT team for laptop allocation and fulfillment. The system sends notifications to the requester regarding approval status and task completion. Employees can also track the status of their requests in real-time, improving transparency and reducing manual effort. This automated process streamlines laptop provisioning, enhances efficiency, and ensures timely delivery of laptops to employees.

Step-1: Define the Problem Statement

Brainstorm & Idea Prioritization

Use this template to explore ideas and solutions for automating the laptop request process using ServiceNow.

10 minutes to prepare

60 minutes to think

1 person (Individual Project)

Before you collaborate

1. Define the goal

Automate the laptop request workflow to simplify submission, approvals, task creation and notifications.

2. Understand the current problem

Identify pain points in the existing manual process and areas that need improvement.

3. Think about possible solutions

List as many ideas as possible without judging. Focus on creativity and automation.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorming.

PROBLEM

How might we automate the laptop request process to make it faster, transparent and easy to track for all users?

Key Rules of Brainstorming

Stay in topic.

Encourage wild ideas.

Defer judgment.

Listen to others.

Go for volume.

Build on others' ideas.

Be visual.

One conversation at a time.

STEP-2: BRAINSTORM, IDEA LISTING AND GROUPING

Brainstorm

Write down any ideas that come to mind that address our problem statement for Laptop Request Automation.

⌚ 10 minutes

Tip:
Focus on quantity of ideas. No idea is too small or silly at this stage.

Me (You)	Person 2	Person 3	Person 4
Online laptop request form	Manager approval flow	Laptop type selection	Auto assignment of tasks
Real-time status tracking	Auto task creation for IT team	Priority levels (High/Medium/Low)	Reminder notifications
Auto approval workflow	SLA for requests	Request validation checks	Mobile friendly portal
Email notifications	Dashboard for request visibility	Attachment support	Request history & reports
Person 5	Person 6	Person 7	Person 8
Integration with asset management	HR onboarding laptop request	IT inventory availability check	Cost center / Department mapping
Track approval timeline	Bulk laptop request option	Custom request fields	Scheduled reports
Comments and updates	Auto closure after delivery	Analytics & reports	Audit logs for requests
Escalation process	Knowledge articles for users	Feedback collection	Download request details

Group Ideas

Group similar ideas together to create meaningful clusters. This helps in understanding major themes and solutions for the Laptop Request Automation project.

⌚ 20 minutes

Tip:
Group similar ideas into clusters. Each group represents a major solution area.

Group 1: Request Submission	Group 2: Approval Process
Online laptop request form	Manager approval flow
Laptop type selection	Auto approval workflow
Attachment support	Escalation process
Group 3: Task & Fulfillment	Group 4: Notifications & Communication
Auto task creation for IT team	Email notifications
Auto assignment of tasks	Reminder notifications
Auto closure after delivery	Comments and updates
Group 5: Tracking & Visibility	Group 6: Inventory & Asset
Real-time status tracking	IT inventory availability check
Dashboard for request visibility	Integration with asset management
Request history & reports	Audit logs for requests
Group 7: Reporting & Analytics	Group 8: Others
Analytics & reports	Priority levels (High/Medium/Low)
Scheduled reports	Mobile friendly portal
Download request details	Knowledge articles for users

STEP-3: IDEA PRIORITIZATION

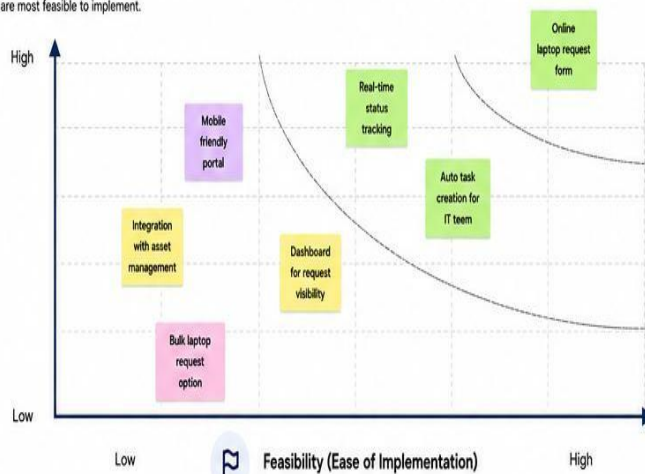

Prioritize

Place your ideas on the matrix to identify which ideas will have the most impact and are most feasible to implement.

⌚ 30 minutes

Importance (Impact)
How much value or impact will this idea bring to users and the organization?

Feasibility (Ease of Implementation)
How easy or practical is it to implement this idea with available resources, time and technology?

High Priority (Do First)	High Impact High Feasibility
Medium Priority (Plan Next)	High Impact / Low Feasibility or Low Impact / High Feasibility
Low Priority (Do Later)	Low Impact Low Feasibility

Tip:
Focus on ideas in the High Priority zone first. These ideas bring high value and are easier to implement.
