

Project Design Phase Proposed Solution Template

Date	29 June 2026
Roll No	23A51A4299
Project Name	Laptop Request Process
Maximum Marks	2 Marks

Proposed Solution

The **Laptop Request Process in ServiceNow** automates the complete laptop request workflow using ServiceNow Service Catalog, Flow Designer, and Approval Workflows. Employees can submit laptop requests through a self-service portal, and the system automatically creates records, routes requests for manager approval, updates request status, and sends notifications. This solution reduces manual effort, speeds up request processing, improves transparency, and enhances overall service efficiency.

Objectives

- Automate laptop request processing.
- Reduce manual work and approval delays.
- Improve request tracking and visibility.
- Enhance user satisfaction through workflow automation.

Key Features

- Service Catalog
- Automated Approval Workflow
- Flow Designer
- Record Creation
- Notification Management
- Request Tracking

Expected Benefits

- Faster laptop request processing
- Improved operational efficiency

- Better transparency and visibility
- Reduced manual errors
- Improved user experience and satisfaction

PROPOSED SOLUTION TEMPLATE

Project Title : Laptop Request Process

Date : 15 February 2025

Prepared By : Navya Pothala

Version : 1.0

1. SOLUTION OVERVIEW

The Laptop Request Process automates the complete lifecycle of laptop requests in an organization using ServiceNow. Employees can submit requests through the Service Catalog, and the system automatically routes them for approval, creates records, updates request status, and sends notifications to the users. This solution reduces manual effort, speeds up processing, improves transparency, and enhances overall IT service efficiency.

2. OBJECTIVES

- Automate laptop request processing.
- Reduce manual work and approval delays.
- Improve request tracking and visibility.
- Enhance user satisfaction through automation.
- Ensure accurate record creation and notifications.

3. TARGET USERS / STAKEHOLDERS

- **Employees (Requesters)** – Submit laptop requests via Service Catalog.
- **Managers (Approvers)** – Review and approve/reject requests.
- **IT Team** – Process approved requests and allocate laptops.
- **System Administrators** – Manage the catalog items and workflows.
- **Organization** – Benefits from efficient and transparent process.

4. PROPOSED SOLUTION DESCRIPTION

The proposed solution uses ServiceNow Service Catalog, Flow Designer, and Approval Workflows to automate the laptop request process. Employees submit requests through a self-service portal. The system creates a request record, triggers an approval workflow, and routes the request to the manager. After approval, the IT team processes the request. The system updates the request status at each stage and sends email notifications to the requester. The entire process is tracked in real-time, ensuring transparency and better service delivery.

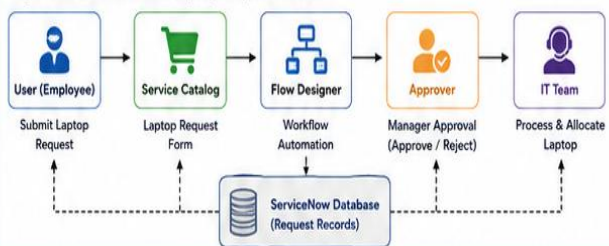

5. KEY FEATURES / FUNCTIONALITIES

- Laptop Request Catalog Item
- Self-Service Request Submission
- Automated Approval Workflow
- Automatic Record Creation
- Request Status Tracking
- Email / Notification Management
- Dashboard and Reports

6. SOLUTION ARCHITECTURE

High-level architecture of Laptop Request Process

7. IMPLEMENTATION APPROACH

Outline the approach and steps to implement the proposed solution.

Phase	Activity / Task	Description	Deliverable	Timeline
1. Planning	Requirement Analysis	Gather requirements from users and stakeholders.	Requirement Document	1 Week
2. Design	Solution Design	Design catalog item, workflow, and approvals.	Solution Design Document	1 Week
3. Development	Configure in ServiceNow	Create catalog item, flows, approvals, notifications.	Configured Solution	2 Weeks
4. Testing	System Testing	Test workflows, approvals, notifications, and tracking.	Test Results	1 Week
5. Deployment	Go Live	Deploy solution and make it available to users.	Live Solution	1 Week
6. Support	Maintenance	Provide support and enhancements as needed.	Support & Updates	Ongoing

8. EXPECTED BENEFITS

- Faster laptop request processing and approvals.
- Improved efficiency and reduced manual effort.
- Better visibility and real-time request tracking.
- Reduced errors and improved data accuracy.
- Higher user satisfaction and better IT service experience.
- Enhanced SLA compliance and resource management.
