

Project Design Phase-II

Data Flow Diagram & User Stories

Date	29 June 2026
Roll no	23A51A4299
Project Name	Laptop Request Process
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Stories – Laptop Request Process

USN-1: As an employee, I can submit a laptop request through the Service Catalog.

USN-2: As an employee, I can provide laptop request details such as laptop type and business justification before submitting the request.

USN-3: As an employee, I can successfully submit my laptop request for processing.

USN-4: As an employee, I can receive confirmation that my laptop request has been submitted.

USN-5: As an employee, I can receive notifications regarding the status of my laptop request.

USN-6: As a manager, I can receive a laptop request approval task.

USN-7: As a manager, I can review the details of a submitted laptop request.

USN-8: As a manager, I can approve a laptop request.

USN-9: As a manager, I can reject a laptop request when necessary.

USN-10: As the system, I can automatically create a request record when a laptop request is submitted.

USN-11: As the system, I can automatically route the request for approval using Flow Designer.

USN-12: As the system, I can create a record after approval for further processing.

USN-13: As the system, I can send notifications to relevant users during the request lifecycle.

USN-14: As an administrator, I can create and manage the Laptop Request catalog item.

USN-15: As an administrator, I can configure catalog variables for capturing laptop request information.

USN-16: As an administrator, I can configure the approval workflow using Flow Designer.

USN-17: As an administrator, I can configure notification actions for request updates.

USN-18: As an administrator, I can monitor the execution of the Laptop Request Flow and verify successful completion.
