

Project Design Phase-II

Technology Stack (Architecture & Stack)

Date	29 june 2026
Roll no	23A51A4299
Project Name	Laptop Request Process
Maximum Marks	4 Marks

Technical Architecture:

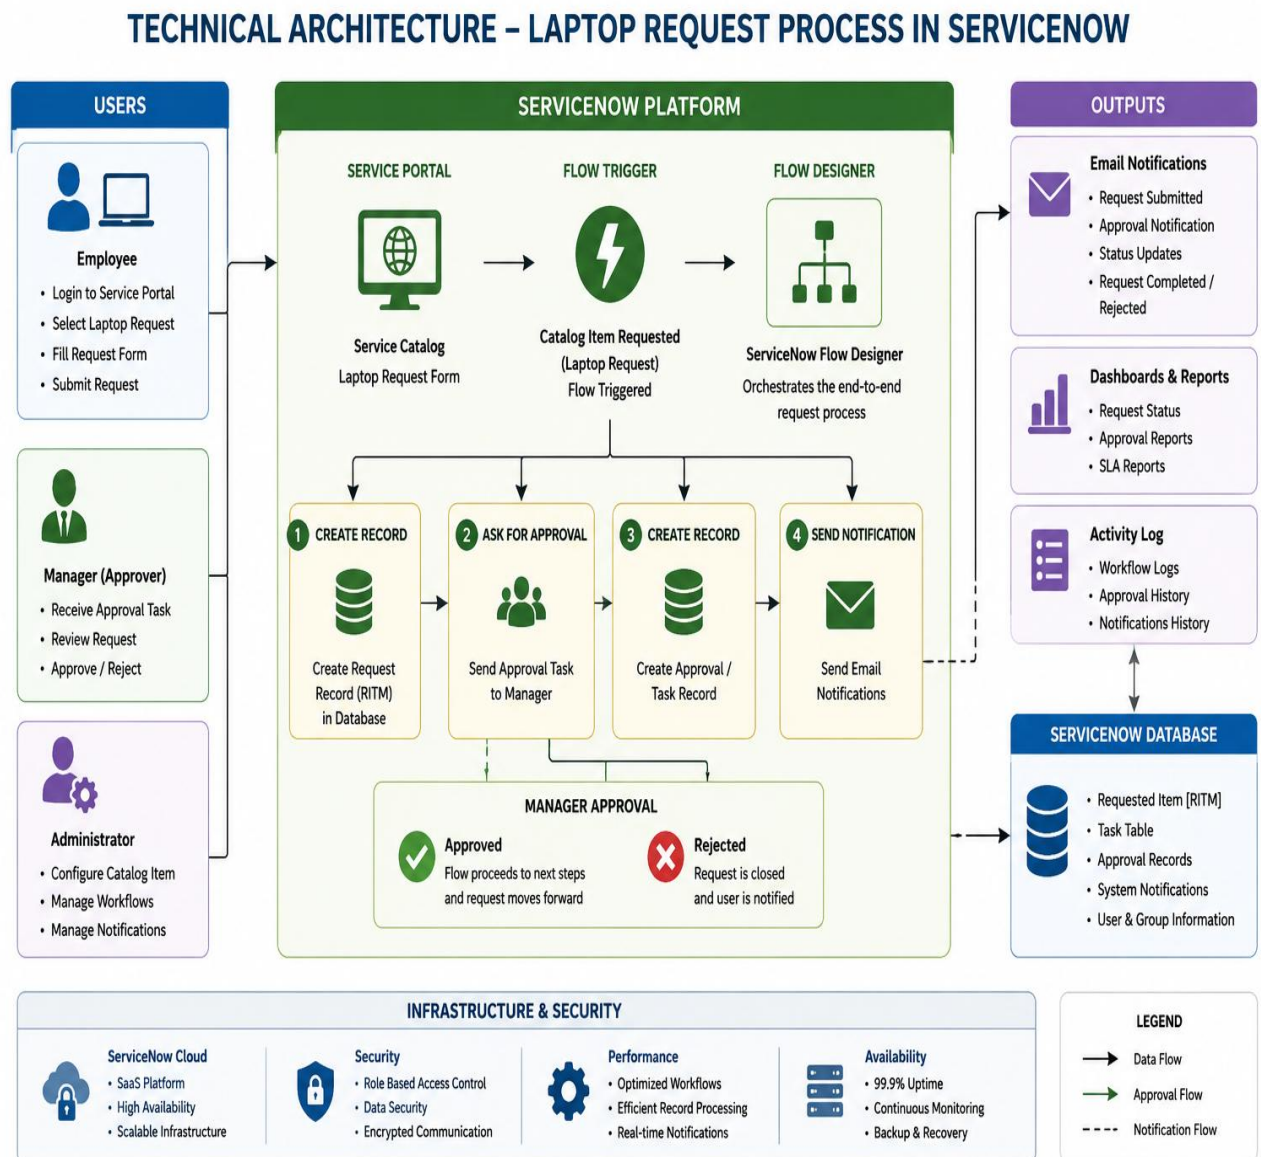

Table-1 : Components & Technologies

S.No	Component	Description	Technology
1	User Interface	Employees submit laptop requests through the Service Portal	ServiceNow Service Portal
2	Application Logic-1	Creation of laptop request records	ServiceNow Flow Designer
3	Application Logic-2	Approval workflow processing	ServiceNow Approval Engine
4	Application Logic-3	Notification management and workflow actions	ServiceNow Notifications
5	Database	Stores request records and workflow information	ServiceNow Tables (RITM, Request)
6	Cloud Database	Cloud-based storage managed by ServiceNow	ServiceNow Cloud Database
7	File Storage	Stores request-related attachments and documents	ServiceNow Attachment Storage
8	External API-1	Not Used	N/A
9	External API-2	Not Used	N/A
10	Machine Learning Model	Not Used	N/A
11	Infrastructure (Server / Cloud)	Application hosted on ServiceNow cloud platform	ServiceNow Cloud Platform (SaaS)

Table-2 : Application Characteristics

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	No external open-source frameworks are used. The project uses ServiceNow's built-in platform capabilities.	ServiceNow Platform
2	Security Implementations	Role-based access control ensures only authorized users can submit, approve, and manage requests.	ServiceNow RBAC, User Roles
3	Scalable Architecture	ServiceNow cloud architecture supports multiple users and request processing efficiently.	ServiceNow Multi-Tenant Cloud Architecture
4	Availability	ServiceNow provides high availability and continuous access through cloud infrastructure.	ServiceNow Cloud Services
5	Performance	Automated workflows reduce manual effort and process requests quickly.	ServiceNow Flow Designer
